

### Features

- Improve patient care, staff satisfaction and workflow through automatic call process reminders
- Initiate customized alarms directly from the touch screen interface and manage evidence-based rounding
- Connect anywhere on the Austco LAN for added flexibility

### IP-DUTY Station

The IP-DUTY Station is a sleek touch screen that provides a clear display of calls, reminders for rounding, wound care and pain assessment. The IP-DUTY Station may also be used to initiate custom notifications for transport, cleaning or user defined events.

A high-resolution back-lit LCD with a bright, high contrast display is easy to read and simple to configure. Call type priorities are color-coded, allowing highest priority calls to be easily identified.

Tacera provides caregivers with the added confidence that they are providing patients with high quality care by initiating rounding, wound care and pain assessment via the IP-DUTY Station. Patient satisfaction is increased as they may be assured that all their needs are taken care of at scheduled intervals throughout the day.

### A Nurse Station in Every Room

The IP-DUTY Station is like having a Nurse Station in every room. Care providers can easily view a list of every active call, in every room, to gain a holistic view of the ward. The level of priority, location, type and duration of each call is displayed as text, and is accompanied by distinctive alert tones for each priority of call.

The IP-DUTY Station can also provide VoIP two-way speech communication, when the IPC-DUTY/VoIP licence is purchased. This allows calls between the IP-DUTY Station and any speech point or nurse station on the system to be easily initiated or answered. It also adds the ability to call out or receive calls, shortcut one-button dialing, and have a hands-free operation push-to-call.

## IPC-DUTY/Workflow

By acquiring the IPC-DUTY/Workflow licence with the IP-DUTY Station, a healthcare facility benefits by having increased clinical workflow features, enabling nurses to manage their day to day tasks such as:

### Rounding

The IP-DUTY Station assists caregivers in supporting the evidence-based practice of rounding by reminding them when it's time to check in on patients. Rounding provides more than a boost to patient satisfaction, it also:

- reduces the number of patient falls
- improves the ward's workflow by reducing the number of calls
- increases interaction between caregivers and patients.

### Pain Assessment

Good pain management is a key component in providing the overall quality of care for your patients. Since a patient's self-report is the single most reliable indicator of the existence and intensity of pain, ongoing communication is vital to managing pain and speeding recovery. Tacera helps caregivers establish and maintain the all-important element of trust with their patients by reminding them to perform invaluable hourly pain assessments.

### Wound Care

A "Wound Care" button on the IP-DUTY Station prompts caregivers to check on patients' wounds so they can apply dressings, administer pain medication, and assist patients to move in bed to relieve pain and prevent bedsores. Wound care reminders can be dispatched directly to your facility's Physical Therapy department or Wound Care group, according to internal processes or the patient's needs. By sending the calls directly to the appropriate wound care providers, nurses can stay focused on their rounding procedures, knowing that their patients are getting the care they need.

## Technical Specifications

Feature	Description
Height	160 mm (6.30 in)
Width	220 mm (8.66 in)
Depth	50 mm (1.97 in)
Weight	390 g (13.76 oz)
Housing	IDES C6200 UL94-V0 plastic
Mounting Method	Wall clamp, flush mount
Mounting Height	142 mm (5.59 in) cavity (inner)
Mounting Width	205 mm (8.07 in) cavity (inner)
Display	Multi Touch Capacitive Screen
Display Resolution	800 x 480 (16:9) Px
Display Size	7"
Power	6 W (Auto power on)
Power Input	PoE IEEE 802.3af or 5 V
VoIP	SIP
Speaker	2 x 1 W
Microphone	Inbuilt
Network	Ethernet (RJ45)
Temperature Range	0–40°C (32–104°F)
Humidity Range	20–85% at 35°C (95°F)

### Compliance

Designed to comply with:

- AS 3811:1998 Hard-wired patient alarm systems for hospitals.
- AS 2999:1989 Alarm systems for the elderly and other persons at risk.
- HTM 08-03: Bedhead services.
- UL 1069 Hospital Signaling and Nurse Call Equipment.
- C-Tick Electromagnetic compatibility.
- IEC 60601-1, UL 60601-1 and CAN/CSA C22.2 No. 601.1-M90: Medical electrical equipment - Part 1: General requirements for safety.
- CE Mark of European Conformity.

Manufactured in general accordance with the requirements of international quality assurance standard ISO9002.

### Product Codes Description

IP-DUTY	Wall Mounted Touch Duty Station *Note: The IP-DUTY Station hardware only includes an activate call list. Additional licenses for VoIP, Workflow and Voice calls purchased separately (Product Family: Tacera)
