

Pulse Mobile

NEW WORKFLOW FEATURE

The new workflow feature is designed to streamline facility processes by initiating workflow events directly from the mobile phone. This optimizes efficiency leading to improvements in the care experience.

Contact your local Austco Representative to learn more on how Pulse Mobile can help improve staff efficiency and increase patient satisfaction.

HIMSS18 Annual Exhibition

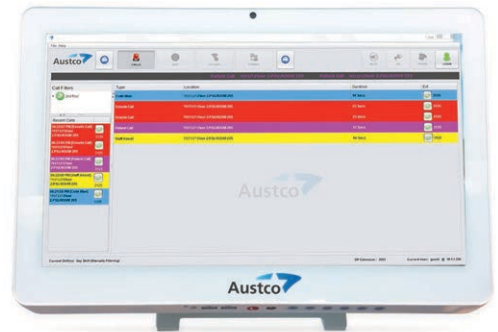

A big thank you to all who stopped by to visit us at the HIMSS18 annual conference and exhibition. This year's show was another success with a big turnout from many Austco partners from around the globe.

IP-TSNS/M-18 Nurse Station

LATEST TOUCHSCREEN TECHNOLOGY

Austco released a new 18 inch nurse station which features a thin body enclosure, USB 3.0, and dual isolated Ethernet, which lets hospitals separate and manage internal and external network traffic. The IP-TSNS/M-18 Nurse Station also features a dedicated audio codec for our background noise-canceling handset to guarantee the best audio quality for calls to other locations.

The new IP-TSNS/M-18 Nurse Station is ideal for applications in hospitals, long-term care facilities, and treatment centers.

Technical Partner Training

Austco held an informative 3-day technical training course in January 2018 which explored the technical aspects of the Tacera Nurse Call System. The training session took place in Melbourne, Australia with topics which included: Tacera System Design, Nurse Call Virtualization, Upgrades and Releases, IP-PST, IP-DUTY and more.

We strive to provide our partners with the education and training they need to exceed their customer's expectations. Thank you to all who participated.

Austco ARK-1 Nurse Call Appliance Release

NEW PRODUCT

The new ARK-1 controller was developed around the premise of superior reliability and durability. The ARK-1's robust design can easily support a full range of healthcare environments.

With its small form-factor, the ARK-1 is ideal for facilities with limited server space which do not want to sacrifice performance or durability. The ARK-1 can be rack or wall-mounted. Austco's newly released ARK-1 will supersede legacy ACS-110 hardware.

Royal Nurse Call

As you may know, the British Royal family's Prince William and the Duchess of Cambridge's Kate Middleton gave birth to their third child, Prince Louis Arthur Charles. What you may not have known, is that the new Prince was born in the Lindo Wing of St. Mary's Hospital where Austco's Nurse Call System is installed. A big congrats to the Royal family from all of us at Austco!

2018 Global Partner Conference Las Vegas, NV, USA

Austco hosted the "Evolution", Global Partner Conference in Las Vegas from March 1 - 2, 2018. The primary goal of the conference was to bring partners together in an open dialogue, under one roof to discuss common strategies.

The 2-day conference provided partners with the opportunity to learn more about the latest Austco solutions, provide input into future developments, share successes and network with other Austco global partners. Thank you to all who attended.
